CHART 1

Gross consumption of natural gas by OECD region

OECD indigenous production of natural gas increased by 2.9% in July 2021 compared to July 2020. Both the OECD Americas (+3.6%, y-o-y¹) and OECD Asia Oceania (+8.6%, y-o-y) drove the increase, specifically in the United States (+3.6%, y-o-y), Canada (+8.0%, y-o-y) and Australia (+10.0%). On the other hand, OECD Europe suffered a -5.9% year-on-year decrease where the United Kingdom (-33.8%, y-o-y) led the negative trend. Overall, total OECD indigenous production of natural gas decreased by 1.6% on a year-to-date² basis.

Total OECD imports (entries)³ of natural gas increased by 3.1% in July 2021 compared to July 2020, with growth in OECD Asia Oceania (+19.6% y-o-y) and the OECD Americas (+2.8% y-o-y) and a slight decrease in OECD Europe (-0.6% y-o-y). Overall, for total OECD, imports from non-OECD countries increased by 6.8% y-o-y, and by 1.0% from OECD countries. In terms of pipeline and LNG split, both pipeline and LNG imports increased by 3.7% y-o-y and 1.4% y-o-y respectively.

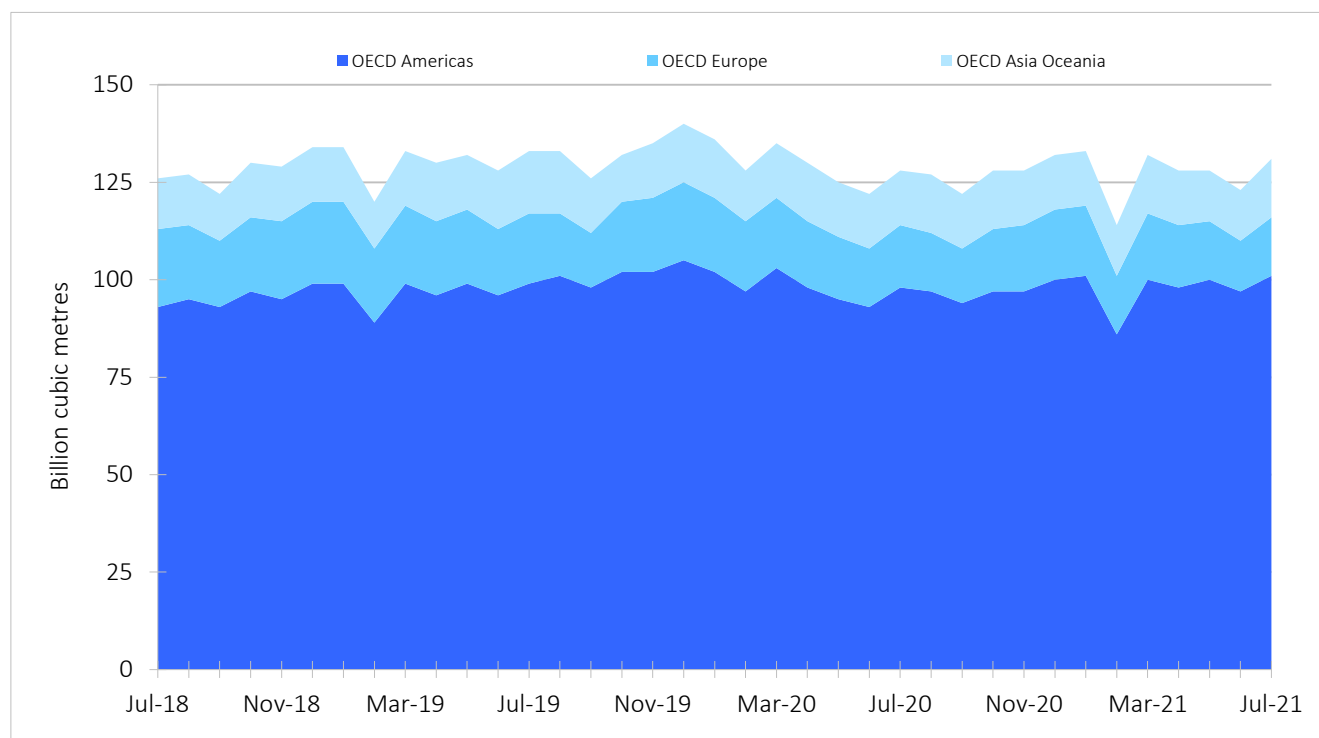

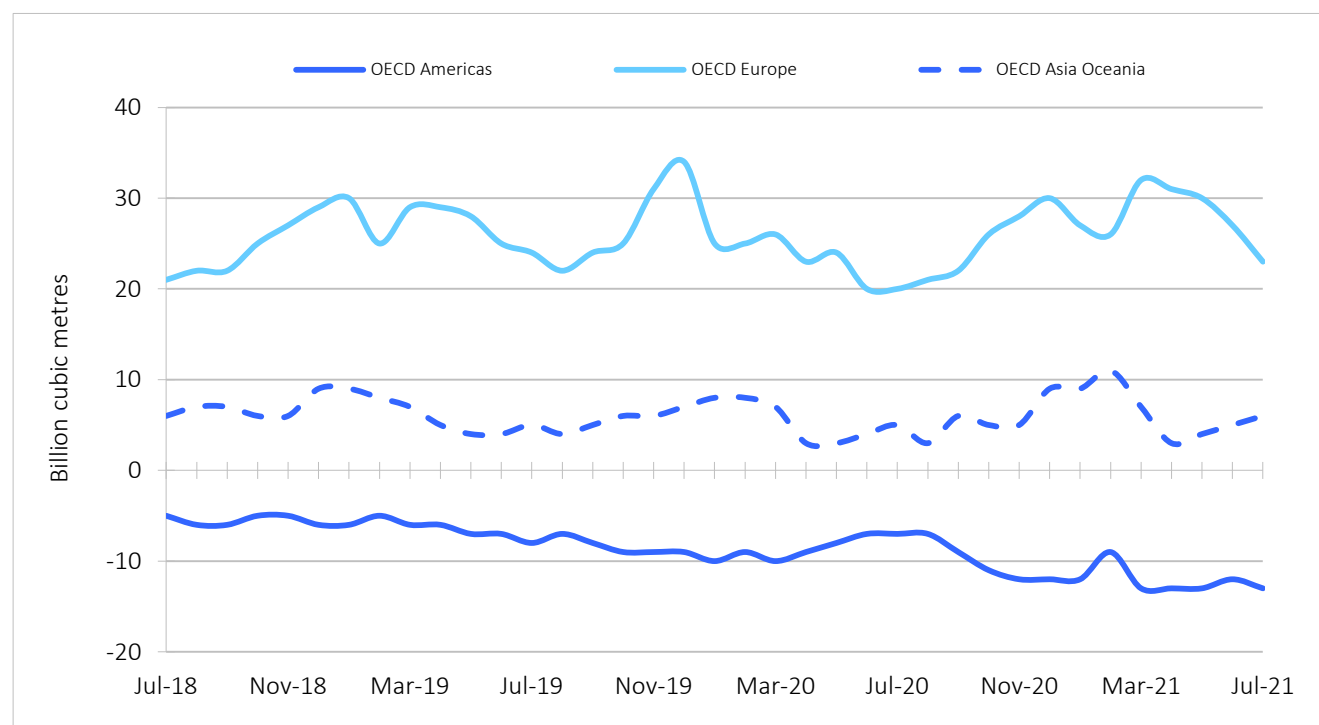

Total OECD exports (exits)³ of natural gas were 9.9% higher in July 2021 compared to the same month last year. Exports followed the same trend as total OECD imports, with both the OECD Americas (+42.7%, y-o-y) and OECD Asia Oceania (+22.5%, y-o-y) experiencing an increase in exports whereas OECD Europe (-7.8%, y-o-y) showed a decrease. The substantial growth in the OECD Americas was mainly due to a large increase in exports of LNG (+212.2% y-o-y).

Total OECD gross consumption of natural gas decreased by 3.0% in July 2021 compared to July 2020, with decreases in both the OECD Americas (-2.9% y-o-y) and OECD Europe (-5.7%, y-o-y), due to decreases in the United States (-4.3%, y-o-y), the Netherlands (-22.7%, y-o-y) and Germany (-14.7%, y-o-y). OECD Asia Oceania, however, experienced a moderate 0.2% increase year-on-year, where declines in Australia (-8.6% y-o-y) and Japan (-4.4% y-o-y) were offset by growth in Korea (+31.2%, y-o-y). Overall, total OECD gross consumption of natural gas increased by 3.5% y-t-d.

1. Year-on-year (y-o-y) change over corresponding month of previous year.

2. Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

3. Transit volumes are included. Trade amounts include intra-regional trade.

CHART 2**Indigenous production of natural gas by OECD region****CHART 3****Net trade of natural gas by OECD region¹**

1. Trade amounts include intra-regional trade.

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to July 2021

2) COUNTRY NOTES

A General Note	Starting with January 2011 data, the Imports and Exports no longer represent ultimate origins and destinations but are replaced by Entries and Exits corresponding the amounts that physically crossed the national boundaries of the country.
Australia	The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
Austria	Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
Belgium	Most recent data on origins of imports and final destinations of exports of LNG are the best estimates from the Belgian Administration based on available preliminary data.
Canada	Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
Finland	Finland is reporting stock levels as of January 2019. Therefore, there is a break in stock levels between December 2018 and January 2019.
Iceland	There is no natural gas data for Iceland, as there is neither production nor consumption.
Israel	The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central
Mexico	Observed gross inland deliveries of natural gas from January 2013 onwards are estimated.
United Kingdom	Exits to the Isle of Man are reported under Non-specified/Other. There is a break in stocks between March and April 2019 due to inclusion of stock held at LNG terminals.
