CHART 1

Gross consumption of natural gas by OECD region

OECD indigenous production of natural gas increased by 4.8% in November 2021 compared to November 2020. All three regions experienced an increase in production on a year-on-year¹ basis. OECD Asia Oceania (+5.2%, y-o-y) led the trend, followed by the OECD Americas (+5.1%, y-o-y) and OECD Europe (+2.6%, y-o-y). The countries driving the increase were, by magnitude, the United States (+5.3%, y-o-y), Canada (+7.3%, y-o-y), Norway (+7.8%, y-o-y) and Australia (+5.8%, y-o-y). Overall, total OECD indigenous production of natural gas increased by 1.0% on a year-to-date² basis.

Total OECD imports (entries)³ of natural gas decreased by 3.4% in November 2021 compared to November 2020. OECD Europe total imports declined by 4.1% y-o-y, mainly due to a significant reduction in imports from non-OECD countries (-11.2%, y-o-y). OECD Asia Oceania (-8.8%, y-o-y) also reduced its imports, with a reduction in imports from Australia (-17.2%, y-o-y) driving the decrease. On the other hand, the OECD Americas (+10.4%, y-o-y) experienced an increase in total imports. In terms of the split by means of transport for total OECD, there was a decrease of pipeline imports (-5.8%, y-o-y), while LNG imports increased by 3.3% y-o-y.

Total OECD exports (exits)³ of natural gas were 0.3% higher in November 2021 compared to the same month last year. Exports increased for both the OECD Americas (+8.7%, y-o-y) – with a rise in exports to OECD countries (+13.0%, y-o-y) – and OECD Asia Oceania (+2.5%, y-o-y) – where contrarily, exports to OECD countries decreased (-17.0%, y-o-y). OECD Europe, however, balanced out total OECD exports and experienced a reduction in exports of 5.5% y-o-y. Following the same trend as for imports, pipeline exports decreased by 1.6% and LNG exports increased by 5.4% y-o-y.

Total OECD gross consumption of natural gas increased by 5.9% in November 2021 compared to November 2020, with increases in all three regions – by 7.2% y-o-y in the OECD Americas, 5.0% y-o-y in OECD Europe and 2.1% y-o-y in OECD Asia Oceania. The main contributors of the increase, by magnitude, were the United States (+8.7%, y-o-y), Italy (+9.8%, y-o-y), France (+16.1%, y-o-y) and Spain (+22.9%, y-o-y). Overall, total OECD gross consumption of natural gas increased by 2.2% y-t-d.

1. Year-on-year (y-o-y) change over corresponding month of previous year.

2. Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

3. Transit volumes are included. Trade amounts include intra-regional trade.

CHART 2

Indigenous production of natural gas by OECD region

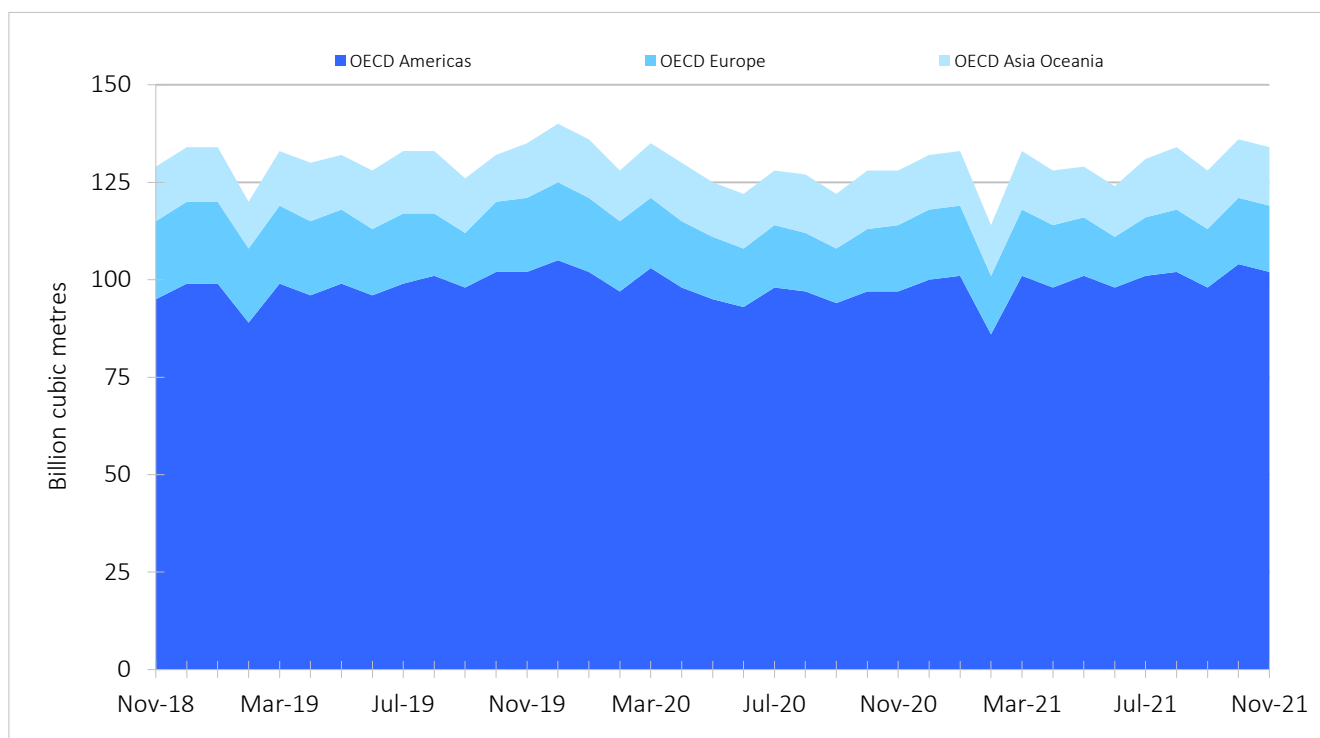

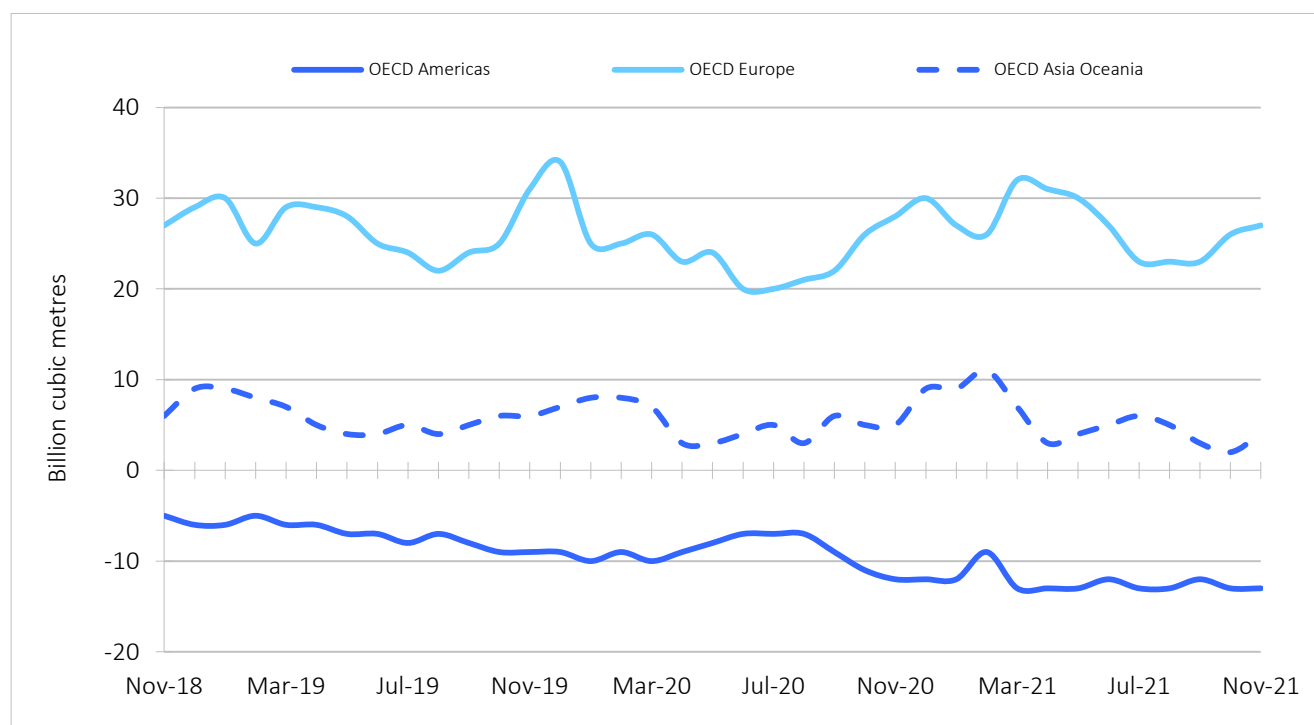

CHART 3

Net trade of natural gas by OECD region¹

1. Trade amounts include intra-regional trade.

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to November 2021

2) COUNTRY NOTES

A General Note	Starting with January 2011 data, the Imports and Exports no longer represent ultimate origins and destinations but are replaced by Entries and Exits corresponding the amounts that physically crossed the national boundaries of the country.
Australia	The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
Austria	Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
Belgium	Most recent data on origins of imports and final destinations of exports of LNG are the best estimates from the Belgian Administration based on available preliminary data.
Canada	Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
Iceland	There is no natural gas data for Iceland, as there is neither production nor consumption.
Israel	The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics.
Mexico	Observed gross inland deliveries of natural gas from January 2013 onwards are estimated.
United Kingdom	Exits to the Isle of Man are reported under Non-specified/Other.
