CHART 1

Gross consumption of natural gas by OECD region

Total OECD indigenous production of natural gas increased by 3.7% in April 2022 compared to April 2021. Both OECD Europe (+7.6%, y-o-y¹) and the OECD Americas (+4.0%, y-o-y) experienced increases in production. In OECD Europe, the increase was led by the United Kingdom (+37.2%, y-o-y) and Norway (+4.9%, y-o-y), despite a large decrease from the Netherlands (-10.4%, y-o-y). The United States (+2.9%, y-o-y) and Canada (+9.6%, y-o-y) were the main drivers in the OECD Americas. Contrarily, OECD Asia Oceania experienced a 2.5% decrease year-on-year, where most of the decline was seen in Australia (-2.8%, y-o-y). Overall, total OECD indigenous production of natural gas increased by 4.0% on a year-to-date² basis.

Total OECD imports (entries)³ of natural gas decreased by a moderate 0.4% in April 2022 compared to April 2021. OECD Europe (-3.3%, y-o-y) drove the decrease, mainly due to reductions of imports from non-OECD countries (Belarus (-77.8%, y-o-y) and Ukraine (-39.9%, y-o-y)), and despite large increases from the United Kingdom (+353.6%, y-o-y) and the United States (+147.3%, y-o-y). On the other hand, the OECD Americas (+9.7%, y-o-y) and OECD Asia Oceania (+8.7%, y-o-y) saw increases in natural gas imports. In terms of the split by means of transport for total OECD, there was a 10.0% year-on-year decrease of pipeline imports, while LNG imports increased by 16.3%.

Total OECD exports (exits)³ of natural gas were 0.7% higher in April 2022 compared to the same month last year. Exports increased in the OECD Americas (+8.2%, y-o-y), with a large rise in exports to OECD countries (+18.7%, y-o-y). Meanwhile, both OECD Asia Oceania (-8.3%, y-o-y) – with substantial reductions in exports to non-OECD countries (-21.0%, y-o-y) – and OECD Europe (-1.5%, y-o-y) – with reduction in exports to OECD countries (-3.4%, y-o-y) – experienced decreases in exports. In terms of the split, total OECD pipeline exports increased by a moderate 0.4%, while LNG exports increased by 1.5% y-o-y.

Total OECD gross consumption of natural gas decreased by 3.4% in April 2022 compared to April 2021. OECD Asia Oceania (-0.1%, y-o-y) experienced a moderate decrease in consumption, with Japan (-1.9%, y-o-y) driving the decrease. OECD Europe experienced a larger decrease in consumption (-19.4%, y-o-y), with decreases observed in all countries. Once again, the reduction was driven by the tightness of gas markets in response to the Russian invasion of Ukraine. Contrarily, the OECD Americas counterbalanced total OECD consumption with a 5.5% increase y-o-y.

1. Year-on-year (y-o-y) change over corresponding month of previous year.

2. Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

3. Transit volumes are included. Trade amounts include intra-regional trade.

CHART 2

Indigenous production of natural gas by OECD region

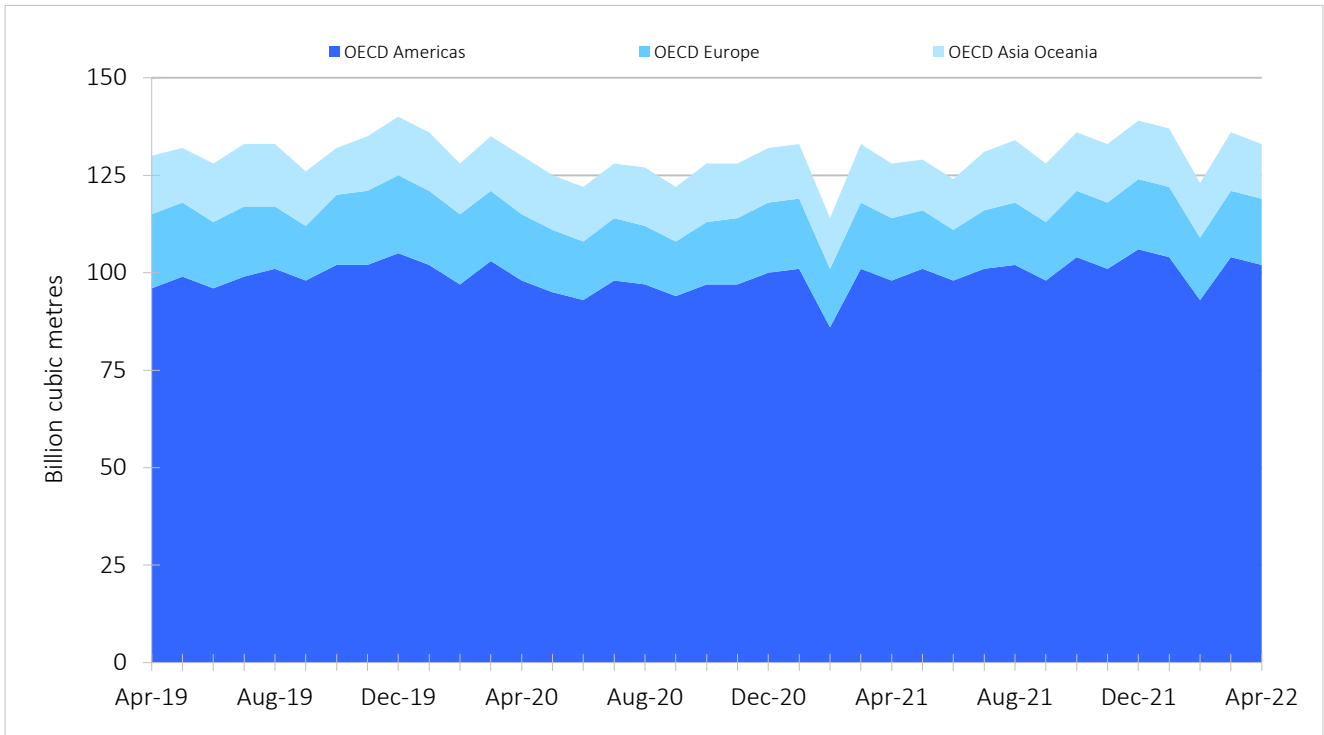

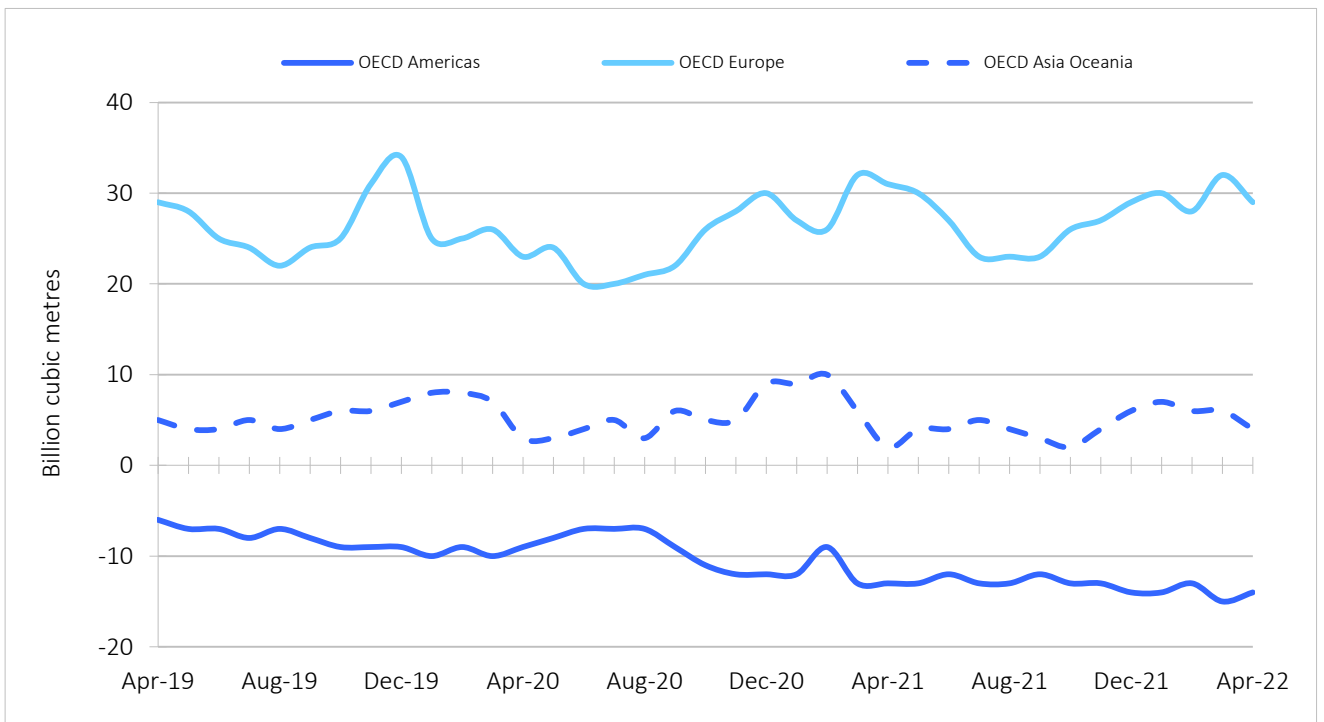

CHART 3

Net trade of natural gas by OECD region¹

1. Trade amounts include intra-regional trade.

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to April 2022

2) COUNTRY NOTES

A General Note	Starting with January 2011 data, the Imports and Exports no longer represent ultimate origins and destinations but are replaced by Entries and Exits corresponding the amounts that physically crossed the national boundaries of the country.
Australia	The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
Austria	Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
Belgium	Most recent data on origins of imports and final destinations of exports of LNG are the best estimates from the Belgian Administration based on available preliminary data.
Canada	Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
Iceland	There is no natural gas data for Iceland, as there is neither production nor consumption.
Israel	The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics.
Mexico	Observed gross inland deliveries of natural gas from January 2013 onwards are estimated.
United Kingdom	Exits to the Isle of Man are reported under Non-specified/Other.
