CHART 1

Gross consumption of natural gas by OECD region

- Total OECD indigenous production of natural gas increased by 5.2% y-o-y¹ in September 2022 compared to September 2021. Production increased at a similar rate in all OECD regions, registering growth ranging from 5.0% y-o-y to 5.3% y-o-y. On a year-to-date basis², total OECD indigenous production was 4.9% higher, with increases observed in all OECD regions. In OECD Europe Norway witnessed the highest increase (9.7% y-t-d) meeting a higher demand for natural gas from European countries.

- Total OECD imports (entries)³ of natural gas dropped by 10.8% y-o-y in September 2022, led by a significant decrease in OECD Europe (-13.8% y-o-y). In this region, flows from Russia, Ukraine and Belarus continued to be low on a year-to-date basis (-21.6% y-t-d, -51.1% y-t-d and -84.8% y-t-d respectively) compared to 2021. This drop was partially mitigated by increased imports from Algeria (36.8% y-t-d), Qatar (49.2% y-t-d) and Tunisia (+13.3% y-t-d).

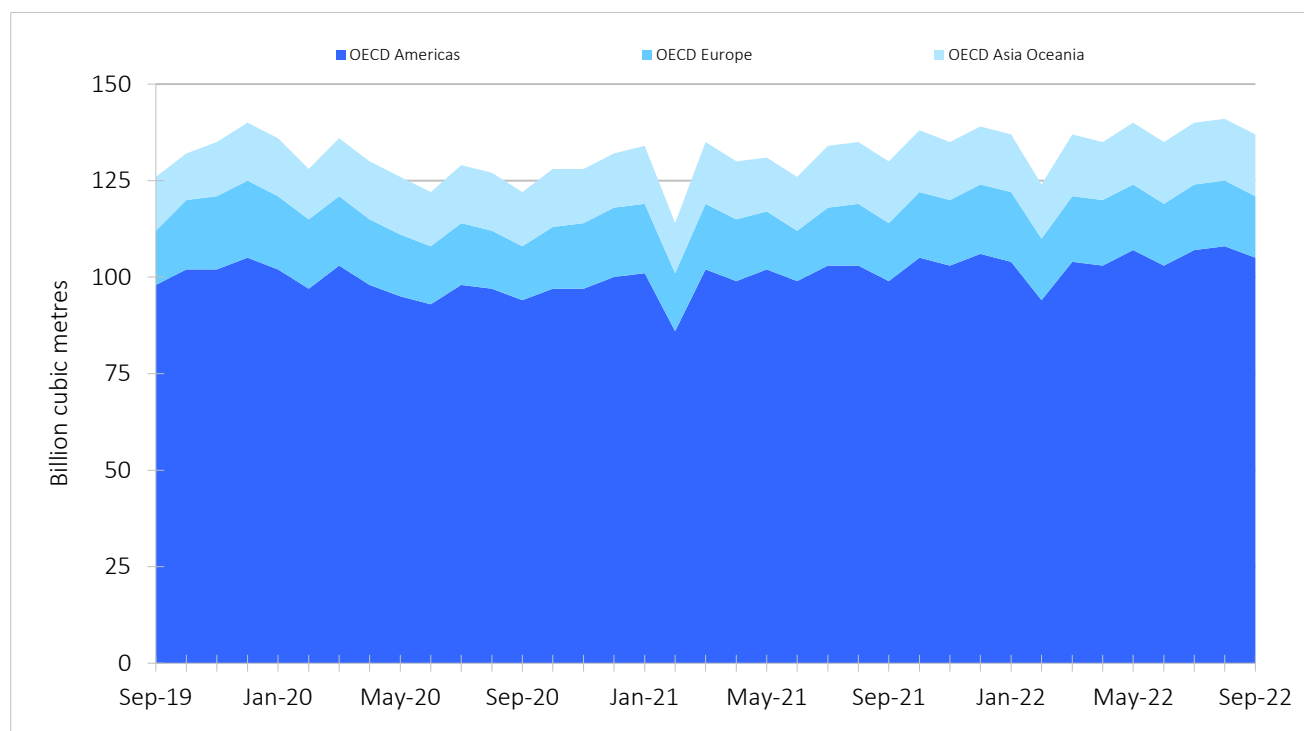

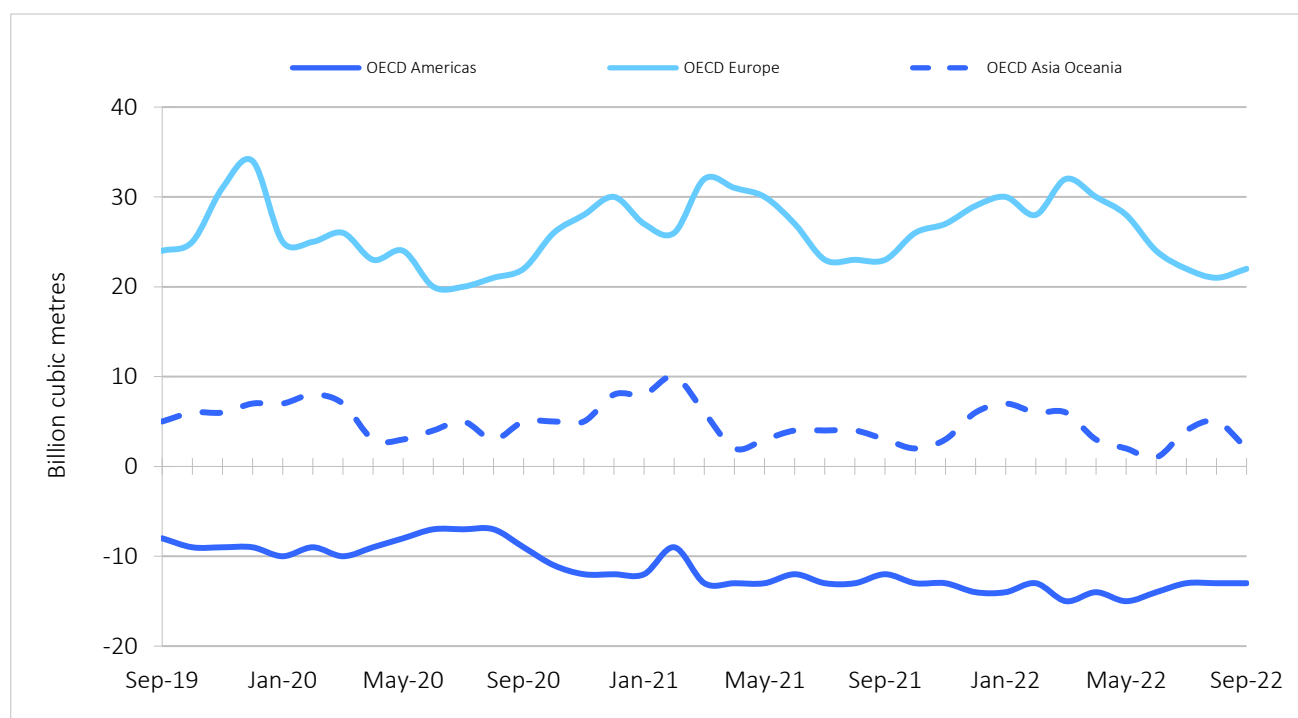

- Total OECD exports (exits)³ of natural gas decreased by 8.9% in September 2022 on a year-on-year basis, driven by lower exports in OECD Europe (-17.8% y-o-y) and OECD Asia Oceania (-0.3 % y-o-y), whereas OECD Americas witnessed a slight growth of 0.9% y-o-y. Similarly, on a year-to-date basis, natural gas exports in the OECD Americas grew by 6.2%, reflecting the significant increase in LNG exports to mainly European countries. LNG Exits to France (274.7% y-t-d), Italy (202.9% y-t-d), Spain (176.8% y-t-d) and the UK (166.8% y-t-d) increased the most compared to 2021.

- Gross consumption of natural gas in total OECD grew by 3.1% y-o-y. Higher consumption in the OECD Americas (7.1% y-o-y) and OECD Asia Oceania (7.4% y-o-y) outweighed by lower consumption in OECD Europe (-8.7% y-o-y). In absolute terms, the USA (7.7% y-o-y) was the main driver behind the increased consumption in the OECD, followed by Japan (1.4% y-o-y) and Canada (4.9% y-o-y). Overall, total OECD consumption remained relatively stable (+0.2% y-t-d) in the first three quarters of 2022 compared to the same period in 2021.

1. Year-on-year (y-o-y) change over corresponding month of previous year.

2. Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

3. Transit volumes are included. Trade amounts include intra-regional trade.

1. Trade amounts include intra-regional trade.

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to September 2022

2) COUNTRY NOTES

A General Note	Starting with January 2011 data, the Imports and Exports no longer represent ultimate origins and destinations but are replaced by Entries and Exits corresponding the amounts that physically crossed the national boundaries of the country.
Australia	The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
Austria	Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
Belgium	There is a change of methodology starting from January 2017, that provides monthly estimations for uses that are not included in the main gas network data. These estimations aim to provide a complete figure of monthly consumption. As such, there is a break in series between December 2016 and January 2017. Most recent data on origins of imports and final destinations of exports of LNG are the best estimates from the Belgian Administration based on available preliminary data.
Canada	Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
Iceland	There is no natural gas data for Iceland, as there is neither production nor consumption.
Israel	The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics.
Mexico	Observed gross inland deliveries of natural gas from January 2013 onwards are estimated.
Türkiye	From July 2022, Turkey was renamed to Republic of Türkiye.
United Kingdom	Exits to the Isle of Man are reported under Non-specified/Other.
