CHART 1

Gross consumption of natural gas by OECD region

- Total OECD indigenous production of natural gas increased by 2.5% year-on-year¹ in November 2022, driven by higher production in the OECD Americas (+3.5% y-o-y) and in OECD Asia-Oceania (+0.8% y-o-y), while production in OECD Europe declined by 1.8% y-o-y. Among the major natural gas producers, the USA (+3.1% y-o-y), Canada (+4.9% y-o-y) and Australia (+1.2% y-o-y) led the growth in production, while slight decreases were observed in Norway (-0.6% y-o-y) and the UK (-2.5% y-o-y). Overall, total OECD indigenous production of natural gas increased by 4.6% on a year-to-date² basis.

- Total OECD imports (entries)³ of natural gas decreased by 9.8% in November 2022 compared to the same month last year, mainly as a result of a sharp decline in OECD Europe (-13.8% y-o-y). In this region, significantly lower entries were observed in a large number of countries, such as Germany (-30.0% y-o-y), Czech Republic (-66.9% y-o-y), Slovakia (-54.2% y-o-y) and Austria (-48.5% y-o-y). Most of the decrease in European imports was due to lower entries by pipeline gas and was only partly mitigated by increased LNG imports (+48.2% y-o-y). Overall, total OECD imports of natural gas dropped by 3.7% on a year-to-date basis.

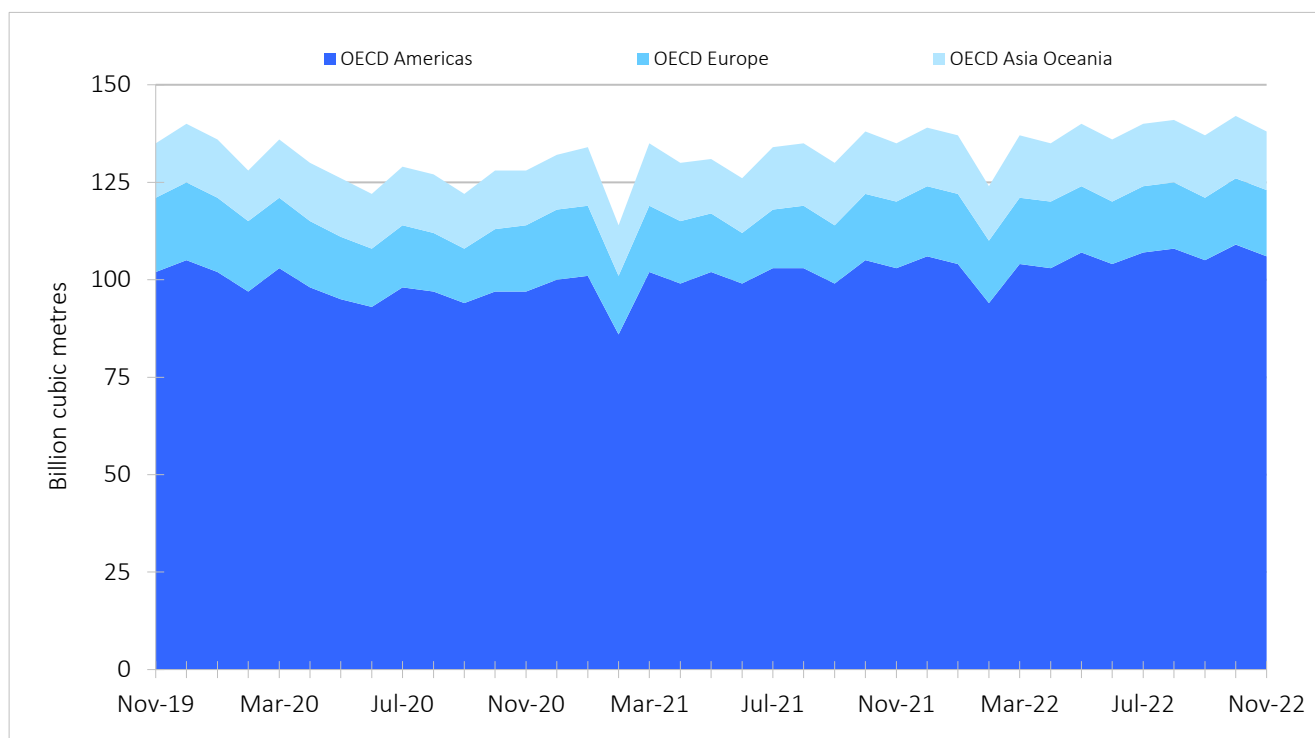

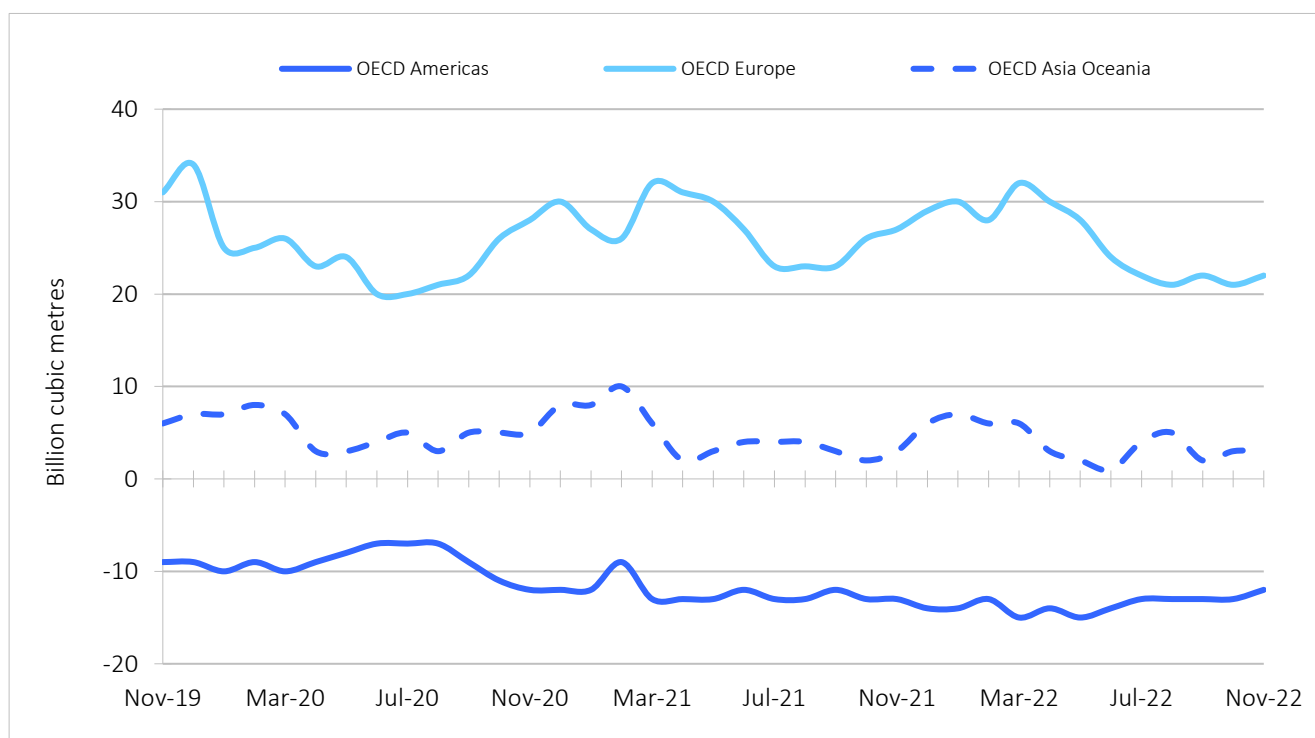

- Total OECD exports (exits)³ fell by 6.1% y-o-y in November 2022, with lower flows being registered across all regions. The steepest decline was observed in OECD Europe (-11.0% y-o-y), followed by OECD Asia Oceania (-2.3% y-o-y) and the OECD Americas (-0.9% y-o-y). The decrease in total OECD exports was almost entirely due to lower pipeline gas flows, as LNG exits remained relatively unchanged (+0.3% y-o-y). On a year-to-date basis, total OECD exports of natural gas slightly dropped by 0.6%.

- Total OECD gross consumption of natural gas fell by 7.2% in November 2022 compared to November 2021. This drop in consumption was largely led by OECD Europe (-26.8% y-o-y) and to a lesser extent by OECD Asia Oceania (-4.7% y-o-y), while the OECD Americas was the only region to register a positive variation (+3.8% y-o-y). In OECD Europe, lower consumption levels were observed in all countries, with the sharpest decreases occurring in Germany (-30.0% y-o-y), Türkiye (-50.5% y-o-y) and Italy (-26.9% y-o-y). In OECD Asia Oceania, lower consumption in Korea (-10.4% y-o-y), Japan (-5.3% y-o-y) and New Zealand (-13.9%) outweighed increased consumption in Australia (+2.3% y-o-y). Overall, total gas consumption in the OECD slightly dropped by 1.1% on a year-to-date basis.

1. Year-on-year (y-o-y) change over corresponding month of previous year.

2. Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

3. Transit volumes are included. Trade amounts include intra-regional trade.

CHART 2**Indigenous production of natural gas by OECD region****CHART 3****Net trade of natural gas by OECD region¹**

1. Trade amounts include intra-regional trade.

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to November 2022

2) COUNTRY NOTES

A General Note	Starting with January 2011 data, the Imports and Exports no longer represent ultimate origins and destinations but are replaced by Entries and Exits corresponding the amounts that physically crossed the national boundaries of the country.
Australia	The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
Austria	Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
Belgium	There is a change of methodology starting from January 2017, that provides monthly estimations for uses that are not included in the main gas network data. These estimations aim to provide a complete figure of monthly consumption. As such, there is a break in series between December 2016 and January 2017. Most recent data on origins of imports and final destinations of exports of LNG are the best estimates from the Belgian Administration based on available preliminary data.
Canada	Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
Iceland	There is no natural gas data for Iceland, as there is neither production nor consumption.
Israel	The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics.
Mexico	Observed gross inland deliveries of natural gas from January 2013 onwards are estimated.
Türkiye	From July 2022, Turkey was renamed to Republic of Türkiye.
United Kingdom	Exits to the Isle of Man are reported under Non-specified/Other.
