CHART 1

Gross consumption of natural gas by OECD region

- Total OECD indigenous production of natural gas remained stable (0.0% y-o-y¹) in June 2023 compared to June 2022. The 18.7% and 3.6% year-on-year decrease in OECD Europe and OECD Asia-Oceania respectively managed to offset growth in the OECD Americas (3.5% y-o-y). On a year-to-date basis², total OECD indigenous production was 3.4% higher, despite the decline observed in OECD Europe (-6.8% y-t-d), which was mainly driven by Norway (-3.8% y-t-d) and the Netherlands (-30.7% y-t-d).

- Total OECD imports (entries)³ of natural gas dropped by 22.9% y-o-y in June 2023, led by a significant decrease in OECD Europe (-28.5% y-o-y). In this region, flows from Russia continued to be low in the first two quarters of 2023 compared to the same period last year (-61.4% y-t-d). This drop was only partially mitigated by increased LNG imports (+7.1% y-t-d), bolstered by substantial intra-regional trade, namely LNG imports from Norway (+508.7% y-t-d).

- Total OECD exports (exits)³ of natural gas decreased by 15.6% y-o-y in June 2023, driven by lower exports in OECD Europe (-34.1% y-o-y) and OECD Asia Oceania (-4.4% y-o-y), whereas OECD Americas witnessed a growth of 5.9% y-o-y. On a year-to-date basis, natural gas exports in the OECD Americas grew by 1.1% driven mainly by LNG trade, with LNG exports to European countries on the rise (largely to the Netherlands (84.5% y-t-d) and the UK (60.1% y-t-d)).

- Gross consumption of natural gas in total OECD declined by 2.1% y-o-y, driven by lower consumption in OECD Asia-Oceania (-3.3% y-o-y) and OECD Europe (-10.3% y-o-y). The Republic of Türkiye (-28.0% y-o-y or 826 mcm) and Italy (-13.8% y-o-y or 583 mcm) witnessed the greatest decrease in natural gas consumption. On a year-to-date basis a similar trend was observed, with total OECD consumption decreasing by 3.9% in the first two quarters of 2023.

1. Year-on-year (y-o-y) change over corresponding month of previous year.

2. Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

3. Transit volumes are included. Trade amounts include intra-regional trade.

CHART 2

Indigenous production of natural gas by OECD region

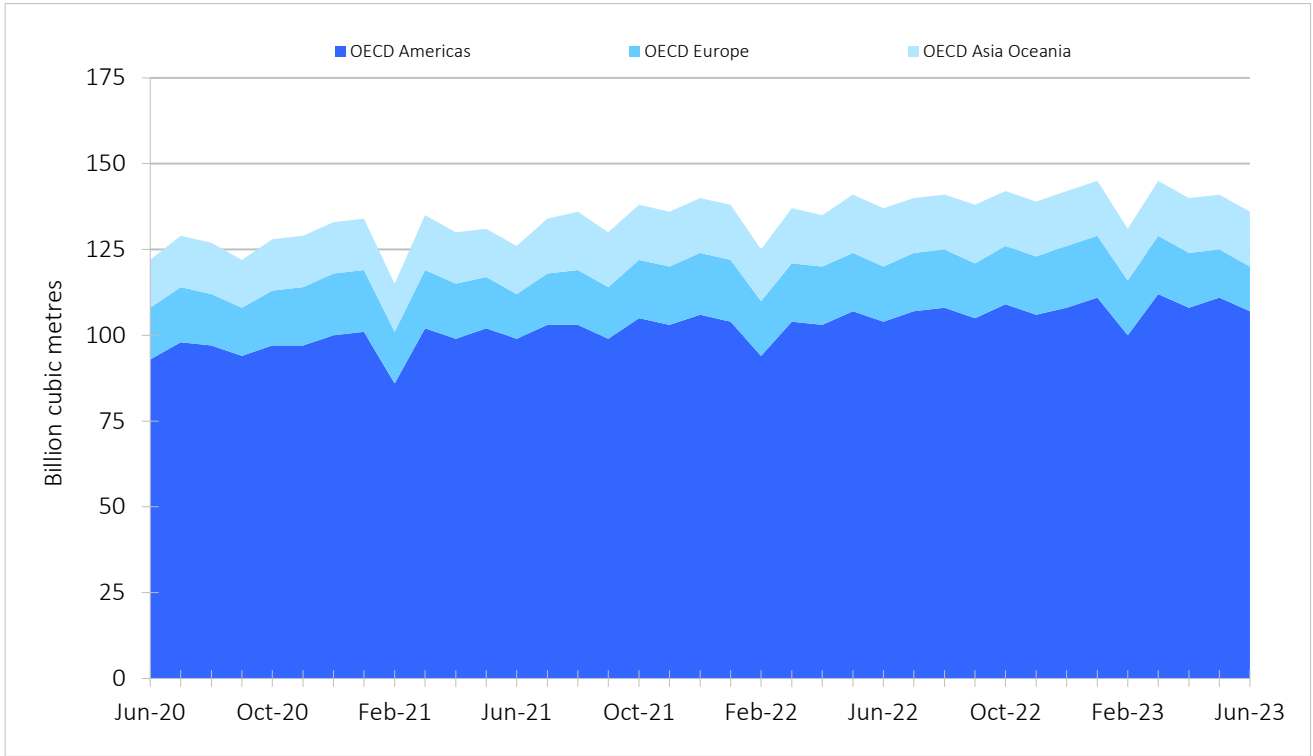

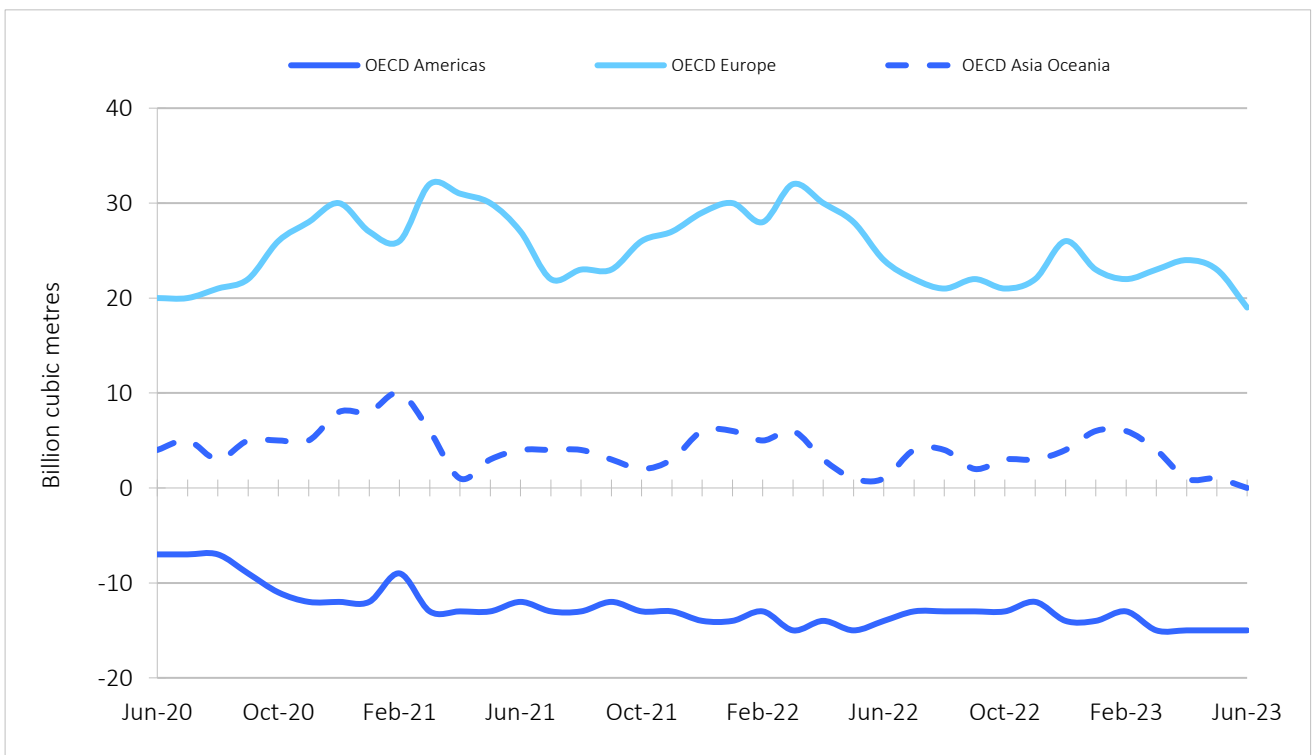

CHART 3

Net trade of natural gas by OECD region¹

1. Trade amounts include intra-regional trade.

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Slovak Republic June 2023
 Israel January 2010 to June 2023

2) COUNTRY NOTES

- A General Note** Starting with January 2011 data, the Imports and Exports no longer represent ultimate origins and destinations but are replaced by Entries and Exits corresponding the amounts that physically crossed the national boundaries of the country.
- Australia** The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
- Austria** Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
- Belgium** There is a change of methodology starting from January 2017, that provides monthly estimations for uses that are not included in the main gas network data. These estimations aim to provide a complete figure of monthly consumption. As such, there is a break in series between December 2016 and January 2017.
- Canada** Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
- Iceland** There is no natural gas data for Iceland, as there is neither production nor consumption.
- Israel** The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics.
- Mexico** Observed gross inland deliveries of natural gas from January 2013 onwards are estimated.
- Türkiye** From July 2022, Turkey was renamed to Republic of Türkiye.
- United Kingdom** Exits to the Isle of Man are reported under Non-specified/Other.
